

2018

We supported Diane Alida at a nursing school in Koudougou for three years. She received her nursing certificate in 2017, then had a baby, Kendriane, in January 2018. She hadn't yet decided whether to marry the father. We will pay for preparatory courses for the next test for government service. She took that test last December during her advanced pregnancy and didn't pass, perhaps not surprisingly.

2017

Diane Alida successfully finished her first year of nursing school in 2016. In her second, she spent two months at a clinic in arural area on an internship. She will finish her training in 2018. (Recommended by Father Albert Kabore)

*Presenting me with a gift.*

2016

We added Diane Alida Kabore to our budget at the last minute at the request of Father Albert. She's enrolled in a nursing school in Koudougou and lives at home. She started classes normally on 15 October. When I found out that she gets up at 5:00 a.m. to walk two kilometers to school, I bought her a bicycle.
